SECOND DESK

INTERNATIONAL ADVISORY

Environmental technologies

Treatment packages for industrial environmental compliance

ENERGY & INFRASTRUCTURE

AI-generated illustration | not an actual project reference

Product scope and commercial role

TECHNICAL SCOPE

- Effluent treatment
- Reuse
- Water quality management
- Solids and emissions-support systems

SECOND DESK ROLE

Technical-commercial qualification, market development and manufacturer or partner coordination.

Source: Second Desk website | sector image, not project evidence

Design basis and operating envelope

INPUTS REQUIRED BEFORE A COMPARABLE QUOTATION

- Waste stream characterization
- Treatment objective
- Permit basis
- Site constraints
- Residual routing

The owner and qualified manufacturer confirm operating conditions and applicable design basis before engineering release.

Engineering and component selection

DESIGN REVIEW POINTS

- Technology basis and mass balance
- Materials
- Monitoring
- Energy/consumables
- Interfaces

Selection trade-off

Confirm whether permit limits apply to inlet, treatment performance or final discharge. Define representative analytical sampling basis.

Project drawings, tolerances and design details remain subject to the responsible supplier or engineer.

Representative technical section

AI-generated technical concept | not to scale or for fabrication

DETAILS TO CONFIRM WITH QUALIFIED SUPPLIER

- Technology basis and mass balance
- Materials
- Monitoring
- Energy/consumables

Confirm the actual construction and dimensions from controlled supplier drawings or approved samples.

Representative functional arrangement

Conceptual sequence for technical discussion. Actual layout and interfaces depend on the approved specification.

Input boundary

Waste stream characterization / Treatment objective

Operating and output boundary

Performance against contract-specific criteria / Sampling and trend records

Fabrication and assembly sequence

AI-generated sector manufacturing scene; illustrative only

TYPICAL CONTROLLED WORKFLOW

01 Tank and frame fabrication

02 Mechanical equipment

03 Dosing and sensor integration

Inspection and quality control

TYPICAL QUALITY CONTROL POINTS

01 Material and leak checks

02 Commissioning test plan

03 Calibration and sample records

AI-generated sector inspection scene; illustrative only

Inspection methods, sampling, hold points and sign-off depend on the order and approved quality plan.

Factory acceptance and site acceptance

FAT / manufacturing release

- Material and leak checks
- Commissioning test plan
- Calibration and sample records

SAT / performance verification

- Performance against contract-specific criteria
- Sampling and trend records
- Alarm proof

Agree test conditions, tolerances, witness authority and punch-list closeout before testing. SAT is distinct from factory release.

Site integration and commissioning readiness

AI-generated sector application scene; illustrative only

SITE PREREQUISITES

01 Verify feed and disposal paths

02 Integrate plant controls

03 Supervised startup

Packing, logistics and delivery

PRODUCT-SPECIFIC PACKING CHECKS

01 Drain and clean packages

02 Secure internals

03 Protect instruments and consumables

Define the Incoterms® rule, named place, export documents, insurance responsibilities and site receipt process in the commercial agreement.

AI-generated sector logistics scene; illustrative only

Technical and commercial risk review

Review residual routing and monitoring requirements; confirm utility and operating assumptions with owner.

Design compliance

Compare the same data sheets, duty and explicitly agreed exclusions.

Technical evidence

Request relevant engineering documents, inspection plan and test records.

Execution risk

Check site access, spares, service scope and the manufacturer's support plan.

Responsibilities across the supply chain

OWNER / EPC	SECOND DESK	MANUFACTURER / CONTRACTOR
Defines duty, project constraints, site interfaces and acceptance authority.	Clarifies the opportunity, identifies suitable suppliers and coordinates technical-commercial communication.	Owns engineering, production, testing, guarantees, site execution and contractual obligations as agreed.

Supplier names, manufacturing capability, certificates, references and country-specific approvals are verified for each enquiry; no standing partner or factory is implied.

RFQ and evidence package

01	**Technical definition**	Duty and design basis, data sheets, scope boundaries and tie-in information.
02	**Supplier evidence**	Capability, drawings, applicable compliance, inspection plan and relevant references.
03	**Commercial offer**	Scope and exclusions, lead time, payment, Incoterms® rule, optional services.
04	**Handover plan**	FAT/SAT where applicable, documentation, spares, training and after-sales.
