SECOND DESK

INTERNATIONAL ADVISORY

Turnkey engineering systems

Integrated production systems across suppliers and site boundaries

INDUSTRIAL EQUIPMENT & MACHINERY

AI-generated illustration | not an actual project reference

Product scope and commercial role

TECHNICAL SCOPE

- Multi-machine lines
- Process plant packages
- Utilities and installation interfaces

SECOND DESK ROLE

Technical-commercial qualification, market development and manufacturer or partner coordination.

Source: Second Desk website | sector image, not project evidence

Design basis and operating envelope

INPUTS REQUIRED BEFORE A COMPARABLE QUOTATION

- Production KPIs
- Material flow
- Capacity balance
- Layout
- Owner standards and division of scope

The owner and qualified manufacturer confirm operating conditions and applicable design basis before engineering release.

Engineering and component selection

DESIGN REVIEW POINTS

- System architecture
- Bottleneck analysis
- Interfaces
- Safety zones
- Commissioning plan

Selection trade-off

Line throughput is governed by the system bottleneck. Compare capacity balance, buffer sizing and changeover strategy.

Project drawings, tolerances and design details remain subject to the responsible supplier or engineer.

Representative technical section

AI-generated technical concept | not to scale or for fabrication

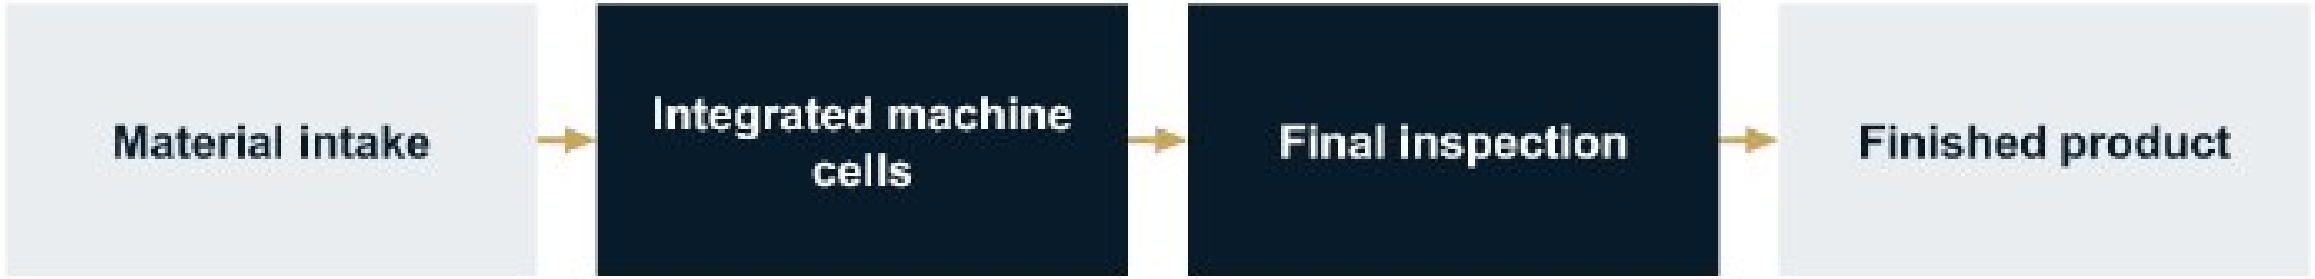
DETAILS TO CONFIRM WITH QUALIFIED SUPPLIER

- System architecture
- Bottleneck analysis
- Interfaces
- Safety zones

Confirm the actual construction and dimensions from controlled supplier drawings or approved samples.

Representative functional arrangement

Conceptual sequence for technical discussion. Actual layout and interfaces depend on the approved specification.



Input boundary

Production KPIs / Material flow

Operating and output boundary

Throughput and quality runs / Acceptance conditions

Fabrication and assembly sequence

AI-generated manufacturing scene, illustrative only

TYPICAL CONTROLLED WORKFLOW

01 Sub-supplier release

02 Module assembly

03 Integration tests

04 Documentation freeze

Inspection and quality control

TYPICAL QUALITY CONTROL POINTS

01 Vendor data reviews

02 Interface checks

03 Integrated FAT where feasible

04 Punch resolution

AI-generated sector inspection scene; illustrative only

Inspection methods, sampling, hold points and sign-off depend on the order and approved quality plan.

Factory acceptance and site acceptance

FAT / manufacturing release

- Vendor data reviews
- Interface checks
- Integrated FAT where feasible
- Punch resolution

SAT / performance verification

- Throughput and quality runs
- Acceptance conditions
- Training and final as-built pack

Agree test conditions, tolerances, witness authority and punch-list closeout before testing. SAT is distinct from factory release.

Site integration and commissioning readiness

AI-generated application scene; illustrative only

SITE PREREQUISITES

01 Site readiness

02 Sequencing and utilities

03 Installation coordination

04 Integration and trial runs

Packing, logistics and delivery

PRODUCT-SPECIFIC PACKING CHECKS

01 Shipment sequence by installation plan

02 Package IDs

03 Arrival and damage inspection

Define the Incoterms® rule, named place, export documents, insurance responsibilities and site receipt process in the commercial agreement.

AI-generated logistics scene; illustrative only

Technical and commercial risk review

Agree supply responsibilities at each interface and test the integrated sequence with representative material.

Design compliance

Compare the same data sheets, duty and explicitly agreed exclusions.

Technical evidence

Request relevant engineering documents, inspection plan and test records.

Execution risk

Check site access, spares, service scope and the manufacturer's support plan.

Responsibilities across the supply chain

OWNER / EPC	SECOND DESK	MANUFACTURER / CONTRACTOR
Defines duty, project constraints, site interfaces and acceptance authority.	Clarifies the opportunity, identifies suitable suppliers and coordinates technical-commercial communication.	Owns engineering, production, testing, guarantees, site execution and contractual obligations as agreed.

Supplier names, manufacturing capability, certificates, references and country-specific approvals are verified for each enquiry; no standing partner or factory is implied.

RFQ and evidence package

01	**Technical definition**	Duty and design basis, data sheets, scope boundaries and tie-in information.
02	**Supplier evidence**	Capability, drawings, applicable compliance, inspection plan and relevant references.
03	**Commercial offer**	Scope and exclusions, lead time, payment, Incoterms® rule, optional services.
04	**Handover plan**	FAT/SAT where applicable, documentation, spares, training and after-sales.
