SECOND DESK

INTERNATIONAL ADVISORY

Architectural stone & project fabrication

Specification-led stone packages for interiors and exteriors

MARBLE & NATURAL STONE

AI-generated illustration | not an actual project reference

Product scope and commercial role

TECHNICAL SCOPE

- Architectural cladding
- Flooring
- Custom panels
- Project-focused fabricated elements

SECOND DESK ROLE

Technical-commercial qualification, market development and manufacturer or partner coordination.

Source: Second Desk website | sector image, not project evidence

Product specification and buyer inputs

INPUTS REQUIRED BEFORE A COMPARABLE QUOTATION

- Application and exposure
- Approved material
- Drawings
- Quantity
- Tolerances
- Test and installation requirements

Confirm approved sample, specification revision and acceptance method before releasing volume.

Construction and selection criteria

DESIGN REVIEW POINTS

- Material performance
- Anchor or support concept
- Movement joints and drainage
- Engineer review
- Veining layout

Selection trade-off

Material selection should account for exposure and intended load; confirm applicable stone tests with the specifier.

Project drawings, tolerances and design details remain subject to the responsible supplier or engineer.

Representative stone section and detail

AI-generated technical concept | not to scale or for fabrication

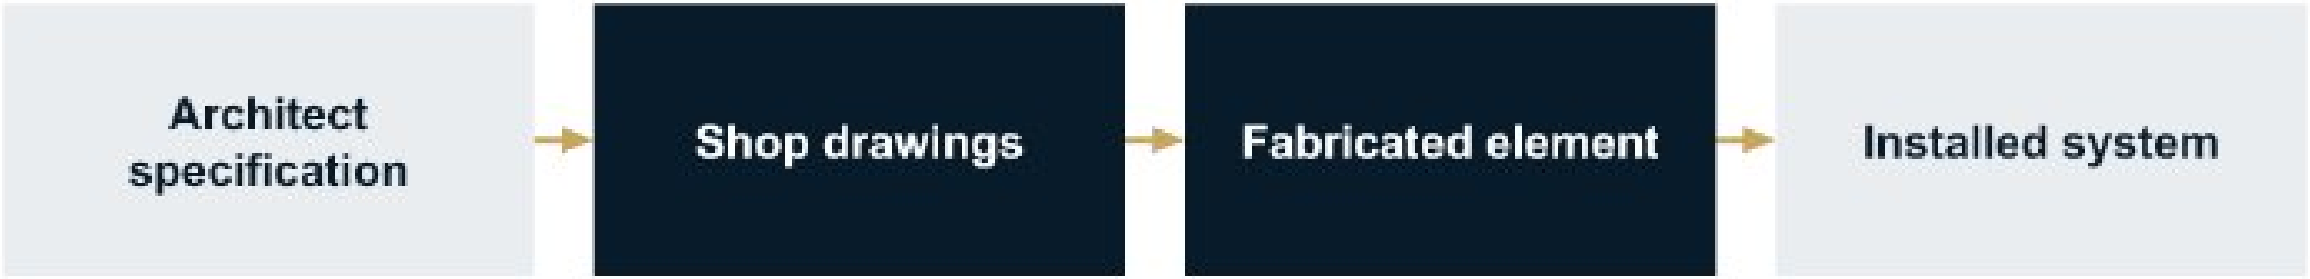
DETAILS TO CONFIRM WITH QUALIFIED SUPPLIER

- Material performance
- Anchor or support concept
- Movement joints and drainage
- Engineer review

Confirm the actual construction and dimensions from controlled supplier drawings or approved samples.

Manufacturing route and control points

Conceptual sequence for technical discussion. Actual layout and interfaces depend on the approved specification.



Approved inputs

Application and exposure / Approved material

Batch and product verification

Visual and dimensional acceptance / Mock-up benchmark

Production and processing stages

AI-generated manufacturing scene, illustrative only

TYPICAL CONTROLLED WORKFLOW

01 Cutting and machining

02 Finish

03 Sample panel or dry-lay

04 Identification and packing planning

Inspection and quality control

TYPICAL QUALITY CONTROL POINTS

01 Test reports as applicable

02 Dimensions and finish

03 Approved mock-up

04 Traceability

AI-generated sector inspection scene; illustrative only

Inspection methods, sampling, hold points and sign-off depend on the order and approved quality plan.

Material approval and receiving criteria

Material or mock-up approval

- Test reports as applicable
- Dimensions and finish
- Approved mock-up
- Traceability

Final inspection / receipt

- Visual and dimensional acceptance
- Mock-up benchmark
- Delivery and installation records

Define sampling or approval method, approval authority and disposition of nonconforming product in writing.

Site interface and installation coordination

AI-generated application scene; illustrative only

APPROVAL OR SITE HANDOFF

01 Verify substrate condition with installer

02 Review anchors and support details with engineer

03 Confirm movement joints and drainage as applicable

04 Agree installation method and sequence

Packing, logistics and delivery

PRODUCT-SPECIFIC PACKING CHECKS

01 Pack by elevation/installation sequence

02 Protect edges

03 Handling instructions and unloading plan

Define the Incoterms® rule, named place, export documents, insurance responsibilities and site receipt process in the commercial agreement.

AI-generated logistics scene; illustrative only

Technical and commercial risk review

Anchor/support geometry, movement joints and drainage require project-specific engineering and installation review.

Reference control

Compare samples, lot traceability and buyer-approved specification.

Quality evidence

Request relevant test records, rejection policy and change control.

Delivery risk

Confirm order size, production window, packing and delivery programme.

Responsibilities across the supply chain

BUYER / SPECIFIER	SECOND DESK	MANUFACTURER / FABRICATOR
Defines product, approved samples, compliance, acceptance and delivery requirements.	Clarifies the opportunity, coordinates supplier qualification and keeps technical-commercial follow-up moving.	Owns engineering or product development, production, quality evidence, pricing and contractual supply.

Supplier names, manufacturing capability, certificates, references and country-specific approvals are verified for each enquiry; no standing partner or factory is implied.

RFQ and evidence package

01	**Material definition**	Stone selection, approved finish, lot or shade range, size and quantity.
02	**Supplier evidence**	Sample and test data, reserve or production capability, prior work where relevant.
03	**Commercial offer**	Block, bundle or cut schedule, lead time, pricing, packing and shipment terms.
04	**Order control**	Material approval, inspection criteria, piece or bundle IDs and delivery programme.
