SECOND DESK

INTERNATIONAL ADVISORY

Quarries & block supply

Natural stone blocks selected for downstream processing

MARBLE & NATURAL STONE

AI-generated illustration | not an actual project reference

Product scope and commercial role

TECHNICAL SCOPE

- Marble and natural stone rough blocks
- Quarry-to-processor supply

SECOND DESK ROLE

Technical-commercial qualification, market development and manufacturer or partner coordination.

Source: Second Desk website | sector image, not project evidence

Product specification and buyer inputs

INPUTS REQUIRED BEFORE A COMPARABLE QUOTATION

- Stone type
- Minimum dimensions
- Color and veining
- Defect acceptance
- Intended cutting direction
- Quantity

Confirm approved sample, specification revision and acceptance method before releasing volume.

Construction and selection criteria

DESIGN REVIEW POINTS

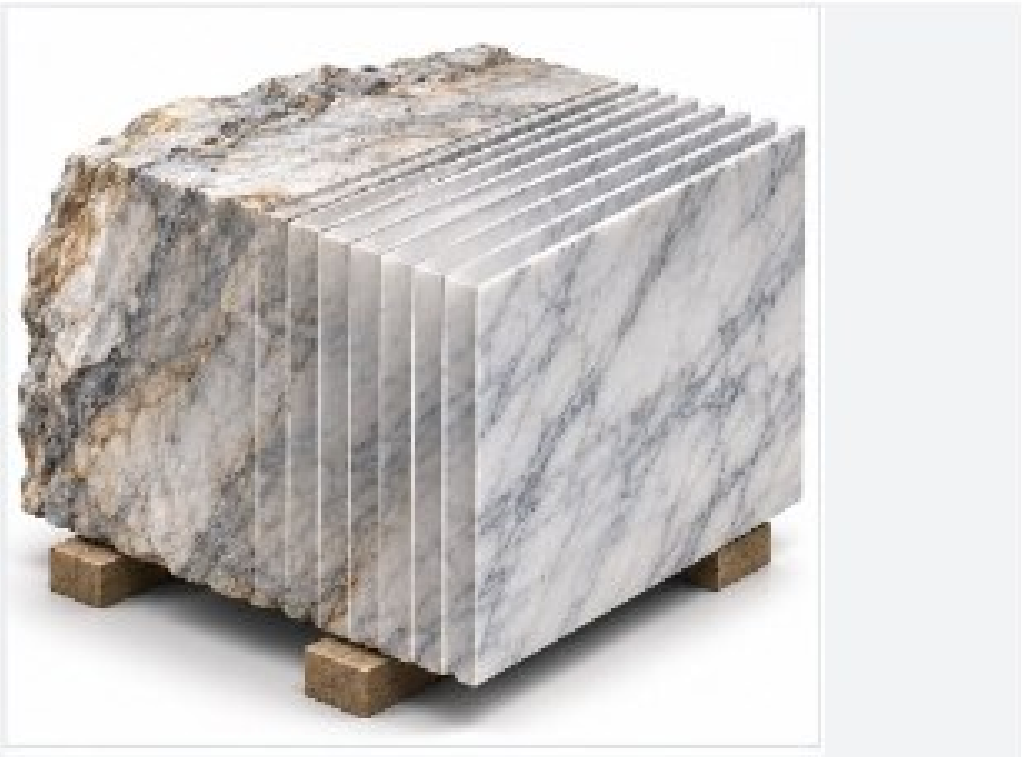
- Block geometry
- Fissures and inclusions
- Orientation
- Yield estimate
- Quarry lot consistency

Selection trade-off

Match block size and geological features to intended sawing direction and target dimensions. Natural variation and fissures affect yield.

Project drawings, tolerances and design details remain subject to the responsible supplier or engineer.

Representative stone section and detail



AI-generated technical concept | not to scale or for fabrication

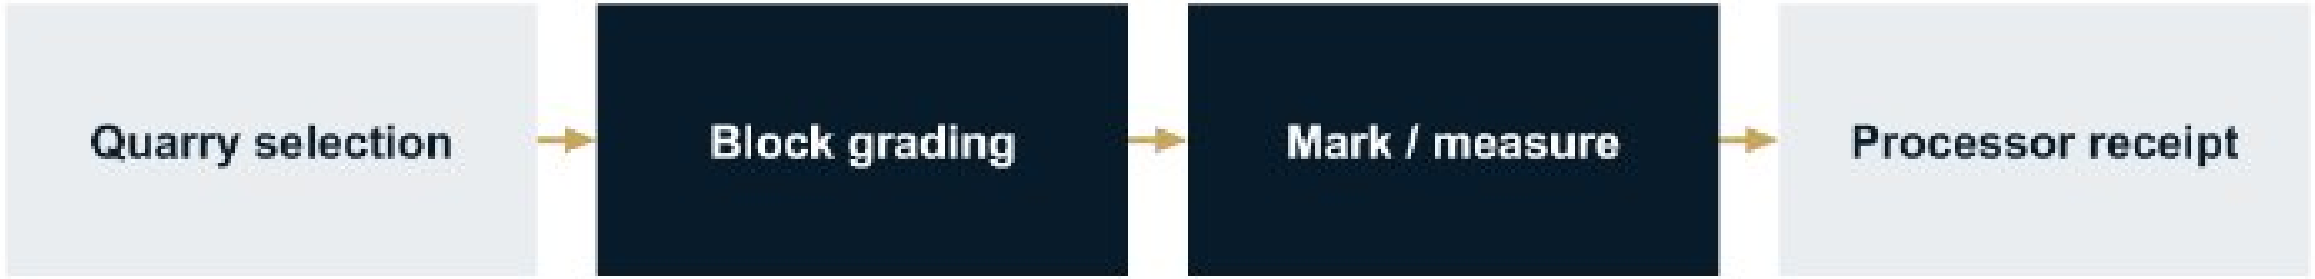
DETAILS TO CONFIRM WITH QUALIFIED SUPPLIER

- Block geometry
- Fissures and inclusions
- Orientation
- Yield estimate

Confirm the actual construction and dimensions from controlled supplier drawings or approved samples.

Manufacturing route and control points

Conceptual sequence for technical discussion. Actual layout and interfaces depend on the approved specification.



Approved inputs

Stone type / Color and veining

Batch and product verification

Block identity and grade / Dimensions and load documentation

Production and processing stages

AI-generated manufacturing scene, illustrative only

TYPICAL CONTROLLED WORKFLOW

01 Block extraction by qualified quarry

02 Squaring

03 Visual grading

04 Tagging and measurement

Inspection and quality control

TYPICAL QUALITY CONTROL POINTS

01 Visual selection

02 Dimension and weight records

03 Representative samples

04 Geological variation disclosure

AI-generated sector inspection scene; illustrative only

Inspection methods, sampling, hold points and sign-off depend on the order and approved quality plan.

Material approval and receiving criteria

Material or mock-up approval

- Processor review
- Approve block photos and selection
- Agree expected cutting orientation

Final inspection / receipt

- Block identity and grade
- Dimensions and load documentation
- Receiving inspection

Define sampling or approval method, approval authority and disposition of nonconforming product in writing.

Processor handoff and receiving

AI-generated application scene; illustrative only

APPROVAL OR SITE HANDOFF

01 Processor review

02 Approve block photos and selection

03 Agree expected cutting orientation

Packing, logistics and delivery

PRODUCT-SPECIFIC PACKING CHECKS

01 Engineered blocking and restraint

02 Verified mass

03 Transport and lifting by qualified parties

Define the Incoterms® rule, named place, export documents, insurance responsibilities and site receipt process in the commercial agreement.

AI-generated logistics scene; illustrative only

Technical and commercial risk review

Document batch identity, visible features and dimensions. Transport and lifting require qualified handling.

Reference control

Compare samples, lot traceability and buyer-approved specification.

Quality evidence

Request relevant test records, rejection policy and change control.

Delivery risk

Confirm order size, production window, packing and delivery programme.

Responsibilities across the supply chain

BUYER / SPECIFIER	SECOND DESK	MANUFACTURER / FABRICATOR
Defines product, approved samples, compliance, acceptance and delivery requirements.	Clarifies the opportunity, coordinates supplier qualification and keeps technical-commercial follow-up moving.	Owns engineering or product development, production, quality evidence, pricing and contractual supply.

Supplier names, manufacturing capability, certificates, references and country-specific approvals are verified for each enquiry; no standing partner or factory is implied.

RFQ and evidence package

01	**Material definition**	Stone selection, approved finish, lot or shade range, size and quantity.
02	**Supplier evidence**	Sample and test data, reserve or production capability, prior work where relevant.
03	**Commercial offer**	Block, bundle or cut schedule, lead time, pricing, packing and shipment terms.
04	**Order control**	Material approval, inspection criteria, piece or bundle IDs and delivery programme.
