SECOND DESK

INTERNATIONAL ADVISORY

Woven labels, printed labels & trims

Brand identity and attachment details for apparel programmes

TEXTILES & APPAREL

AI-generated illustration | not an actual project reference

Product scope and commercial role

TECHNICAL SCOPE

- Woven labels
- Printed care labels
- Patches
- Tapes and selected trims

SECOND DESK ROLE

Technical-commercial qualification, market development and manufacturer or partner coordination.

Source: Second Desk website | sector image, not project evidence

Product specification and buyer inputs

INPUTS REQUIRED BEFORE A COMPARABLE QUOTATION

- Artwork and dimensions
- Fold type
- Yarn/base material
- Attachment
- Colors
- Wash conditions

Confirm approved sample, specification revision and acceptance method before releasing volume.

Construction and selection criteria

DESIGN REVIEW POINTS

- Weave density or print method
- Edge finish
- Legibility
- Skin contact and durability
- Placement

Selection trade-off

Confirm artwork legibility at production size, fold format and attachment method. Review base fabric and wash durability.

Project drawings, tolerances and design details remain subject to the responsible supplier or engineer.

Representative material construction

AI-generated technical concept | not to scale or for fabrication

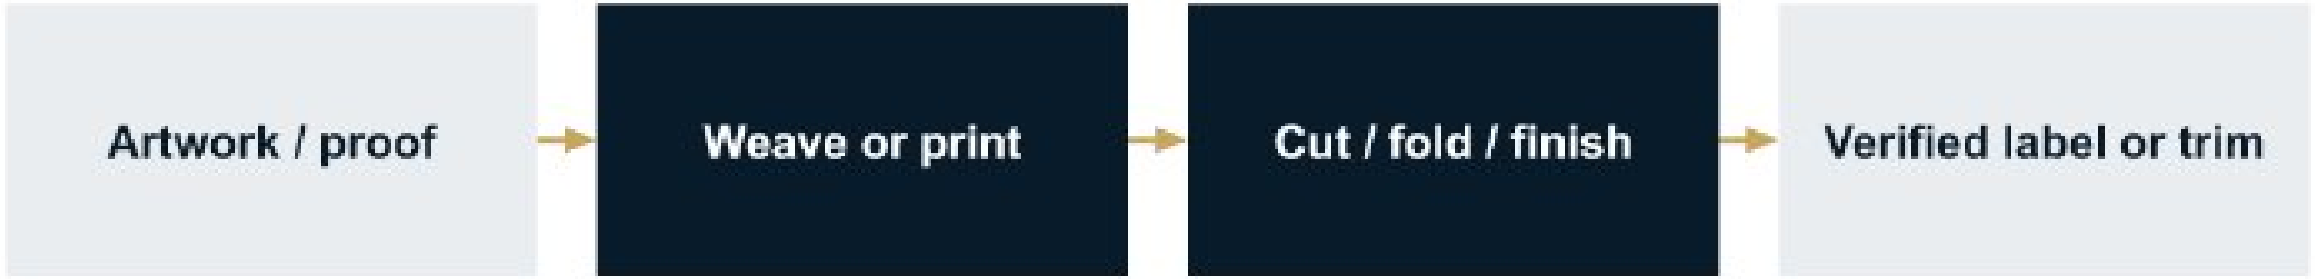
DETAILS TO CONFIRM WITH QUALIFIED SUPPLIER

- Weave density or print method
- Edge finish
- Legibility
- Skin contact and durability

Confirm the actual construction and dimensions from controlled supplier drawings or approved samples.

Manufacturing route and control points

Conceptual sequence for technical discussion. Actual layout and interfaces depend on the approved specification.



Approved inputs

Artwork and dimensions / Yarn/base material

Batch and product verification

Batch sample comparison / Count and traceability

Production and processing stages

AI-generated manufacturing scene, illustrative only

TYPICAL CONTROLLED WORKFLOW

01 Artwork proof

02 Weaving or printing

03 Heat or cold cut

04 Folding

05 Inspection and bundling

Inspection and quality control

TYPICAL QUALITY CONTROL POINTS

01 Color and dimension checks

02 Legibility

03 Edge quality

04 Attachment and wash resistance if required

AI-generated sector inspection scene; illustrative only

Inspection methods, sampling, hold points and sign-off depend on the order and approved quality plan.

Sample approval and lot acceptance

Pre-production / reference approval

- Sealed artwork and sample approval
- Sewing or application trial
- Approve care information

Final inspection / receipt

- Batch sample comparison
- Count and traceability
- Test reports where agreed

Define sampling or approval method, approval authority and disposition of nonconforming product in writing.

Sample development and application fit

AI-generated application scene; illustrative only

APPROVAL OR SITE HANDOFF

01 Sealed artwork and sample approval

02 Sewing or application trial

03 Approve care information

Packing, logistics and delivery

PRODUCT-SPECIFIC PACKING CHECKS

01 Bundle by SKU and lot

02 Protect from moisture or deformation

03 Barcode or carton labels

Define the Incoterms® rule, named place, export documents, insurance responsibilities and site receipt process in the commercial agreement.

AI-generated logistics scene; illustrative only

Technical and commercial risk review

Ensure care-label content and placement come from buyer-approved requirements. Verify color and dimensions against sealed sample.

Reference control

Compare samples, lot traceability and buyer-approved specification.

Quality evidence

Request relevant test records, rejection policy and change control.

Delivery risk

Confirm order size, production window, packing and delivery programme.

Responsibilities across the supply chain

BUYER / SPECIFIER	SECOND DESK	MANUFACTURER / FABRICATOR
Defines product, approved samples, compliance, acceptance and delivery requirements.	Clarifies the opportunity, coordinates supplier qualification and keeps technical-commercial follow-up moving.	Owns engineering or product development, production, quality evidence, pricing and contractual supply.

Supplier names, manufacturing capability, certificates, references and country-specific approvals are verified for each enquiry; no standing partner or factory is implied.

RFQ and evidence package

01	**Product definition**	Specification or tech pack, artwork where applicable, quantity and tolerance.
02	**Supplier evidence**	Capability, approved samples, relevant testing, references and traceability.
03	**Commercial offer**	MOQ, volume, lead time, pricing, sample and shipment terms.
04	**Order control**	Approval milestones, inspection plan, packaging, delivery documents.
