SECOND DESK

INTERNATIONAL ADVISORY

Yarn, fabrics & technical textiles

Material construction and performance for converter and industrial buyers

TEXTILES & APPAREL

AI-generated illustration | not an actual project reference

Product scope and commercial role

TECHNICAL SCOPE

- Spun and filament yarn
- Woven/knitted fabrics
- Greige and finished materials
- Technical textiles

SECOND DESK ROLE

Technical-commercial qualification, market development and manufacturer or partner coordination.

Source: Second Desk website | sector image, not project evidence

Product specification and buyer inputs

INPUTS REQUIRED BEFORE A COMPARABLE QUOTATION

- Fibre composition
- Yarn count
- Construction
- GSM
- Width
- End use
- Performance and lot size

Confirm approved sample, specification revision and acceptance method before releasing volume.

Construction and selection criteria

DESIGN REVIEW POINTS

- Yarn twist and strength
- Weave/knit structure
- Finishing and shrinkage
- Color and performance criteria

Selection trade-off

Compare construction, fibre and GSM as a package. Agree test methods and conditioning before interpreting performance results.

Project drawings, tolerances and design details remain subject to the responsible supplier or engineer.

Representative material construction

AI-generated technical concept | not to scale or for fabrication

DETAILS TO CONFIRM WITH QUALIFIED SUPPLIER

- Yarn twist and strength
- Weave/knit structure
- Finishing and shrinkage
- Color and performance criteria

Confirm the actual construction and dimensions from controlled supplier drawings or approved samples.

Manufacturing route and control points

Conceptual sequence for technical discussion. Actual layout and interfaces depend on the approved specification.

Approved inputs

Fibre composition / Yarn count

Batch and product verification

Approved reference / Test report

Production and processing stages

AI-generated manufacturing scene, illustrative only

TYPICAL CONTROLLED WORKFLOW

01 Fibre preparation or yarn sourcing

02 Spinning/weaving/knitting

03 Dyeing and finishing

04 Inspection

Inspection and quality control

TYPICAL QUALITY CONTROL POINTS

01 Composition, count, GSM and width

02 Shade continuity

03 Tensile or performance tests

04 Roll inspection

AI-generated sector inspection scene; illustrative only

Inspection methods, sampling, hold points and sign-off depend on the order and approved quality plan.

Sample approval and lot acceptance

Pre-production / reference approval

- Sample or lab dip approval
- Trial conversion
- Establish tolerances and change control

Final inspection / receipt

- Approved reference
- Test report
- Roll grading
- Lot traceability and quantity reconciliation

Define sampling or approval method, approval authority and disposition of nonconforming product in writing.

Sample development and application fit

AI-generated application scene; illustrative only

APPROVAL OR SITE HANDOFF

01 Sample or lab dip approval

02 Trial conversion

03 Establish tolerances and change control

Packing, logistics and delivery

PRODUCT-SPECIFIC PACKING CHECKS

01 Roll wrapping and labels

02 Shade/lot segregation

03 Moisture and contamination protection

AI-generated logistics scene; illustrative only

Define the Incoterms® rule, named place, export documents, insurance responsibilities and site receipt process in the commercial agreement.

Technical and commercial risk review

Control shade continuity, width and dimensional change across lots; match test requirements to intended use.

Reference control

Compare samples, lot traceability and buyer-approved specification.

Quality evidence

Request relevant test records, rejection policy and change control.

Delivery risk

Confirm order size, production window, packing and delivery programme.

Responsibilities across the supply chain

BUYER / SPECIFIER	SECOND DESK	MANUFACTURER / FABRICATOR
Defines product, approved samples, compliance, acceptance and delivery requirements.	Clarifies the opportunity, coordinates supplier qualification and keeps technical-commercial follow-up moving.	Owns engineering or product development, production, quality evidence, pricing and contractual supply.

Supplier names, manufacturing capability, certificates, references and country-specific approvals are verified for each enquiry; no standing partner or factory is implied.

RFQ and evidence package

01	**Product definition**	Specification or tech pack, artwork where applicable, quantity and tolerance.
02	**Supplier evidence**	Capability, approved samples, relevant testing, references and traceability.
03	**Commercial offer**	MOQ, volume, lead time, pricing, sample and shipment terms.
04	**Order control**	Approval milestones, inspection plan, packaging, delivery documents.

SECOND DESK

INTERNATIONAL ADVISORY

Discuss your next requirement

Share the application, target market or project, technical specification and expected delivery scope.
